

Contract Manufacturing Partnership

Ferrotec
International

Ferrotec International

HANGZHOU
SHANGHAI

Ferrotec Corporation is a global company headquartered in Japan with sales and manufacturing locations worldwide including the USA, Japan, China, Germany, UK, Spain, Italy, Singapore and Taiwan.

Ferrotec International is part of the Ferrotec group of companies. Established in 2000 and based in Nashua, NH, Ferrotec International was formed to provide the US and European marketplace easy accessibility to the offshore manufacturing capabilities of Ferrotec's well established China-based manufacturing operations.

Ferrotec International offers high precision mechanical, electrical and electro-mechanical contract manufacturing resources. Ferrotec International combines the efficient and state of the art manufacturing capability of its plants in China with local project management in the US. This enables us to bring you the high quality and low cost of offshore manufacturing, combined with the effectiveness of working with project managers and engineers based in your own country and time zone.

In addition, Ferrotec can offer you easy access to the rapidly growing China marketplace. The factory in effect, becomes an extension of your own, offering you a China-based manufacturing and distribution center, close to your major customers in that region.

Ferrotec Hangzhou

The primary contract manufacturing facility is situated in Hangzhou, approximately 180 km from Shanghai in the north of the Zhejiang province. The city has a population of 6 million people and an area of 16800 square km.

Ferrotec also has facilities in Shanghai.

As the capital of Zhejiang province, Hangzhou is the political, economic, cultural, and educational center of Zhejiang.

After rapid development over the last couple of decades, Hangzhou has become an attractive city in the Yangtze river delta area with an attractive investment environment.

Hangzhou is also an important communications and transportation hub in Southeast China due to its convenient air, land and water access.

Ferrotec's modern facilities are world class and equipped with the latest manufacturing equipment. The China facilities total over 350,000 square feet (31,000 m²) in size and employ over 1500 people. Under local management, Ferrotec's facilities in China are committed to serving the needs of customers globally while motivating and rewarding employees, preserving the environment and providing long term growth. The Hangzhou facility has achieved ISO 9002 accreditation.

capabilities

Ferrotec's capabilities are constantly growing to meet the continuously changing demands of the marketplace. They range from machining and assembly to mechanical, electromechanical and software engineering design. We offer a truly broad range of services from simple component manufacture and assembly to full project outsourcing capability, from concept to completion, including design, manufacture, inventory stocking and supply.

- Precision machining
- Contract assembly
- Plating and coating
- Electro-mechanical assembly
- Clean room assembly
- Sheet metal fabrication
- Vacuum welding
- Mechanical design
- Software design
- Comprehensive product testing
- Global purchasing / procurement capabilities

Developing manufacturing alliances with a qualified contract manufacturer has proven to be the path to success for many companies.

By establishing a relationship with the right contract manufacturer, you will be free to focus your resources on your core competencies. At Ferrotec we will help you to achieve your goals of improved quality, reduced cycle time, reduced cost, reductions in manufacturing lead time or rapid, low cost expansion of manufacturing capacity.

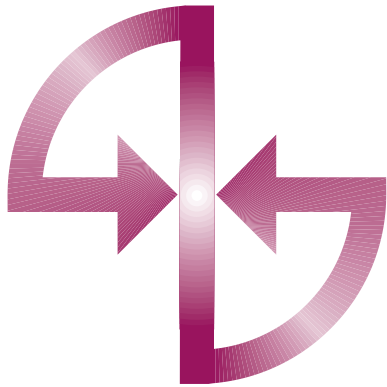

why outsource ?

- Resource expansion
- Improved quality
- Reduced investment in manufacturing
- Reduced manufacturing lead time
- Product distribution in Asia
- Reduced market risk and currency fluctuations
- ISO accreditation

Our engineering resources compliment our manufacturing capabilities allowing us to provide you with unparalleled service. Our goal is to build high quality long-term relationships based on delivering the highest value and best service.

dealing direct

- Direct sales contact
- Comprehensive project management
- Working in your time zone
- Logistics support services
- Eliminate currency translation issues

Customer service is our top priority.

Beginning with direct sales contact followed by comprehensive technical project management, Ferrotec International provides you with local sales and service support. We are available to work with you in your time zone and on your time schedule.

You realize the advantages that offshore manufacturing can provide without dealing with the disadvantages.

We can provide the logistics support services that complete your virtual factory. From mass production of complex machined piece parts to the complete assembly, test, packaging and shipment of your product to your customer, we become a flexible extension of your own organization.

We offer a strategic partnership. In an age of relentless product evolution to support rapid market changes you need a partner that will stand beside you no matter what the challenge - a partner that works with you to produce the best value for money and the highest growth in your bottom line.
